

The Role of Ecosystem Research in Developing Adaptation and Mitigation Strategies to Climate Change

Presented by the Association of
Ecosystem Research Centers

Science briefing for policymakers
Thursday, October 9, 2014
10:00-11:00 AM
334 Cannon House Office Building

A distinguished panel of scientists will present the findings of their research on the role of ecosystem science in our nation's ability to prepare for and respond to a changing climate.

Speakers:

Dr. Jerry Hatfield, U.S. Department of Agriculture
Dr. Julia Cherry, University of Alabama
Dr. G. Darrel Jenerette, University of California, Riverside
