Resolution of Respect

Henry Gholz 1951-2017

The Association of Ecosystem Research Centers wishes to gratefully acknowledge the contributions of Henry L. Gholz to Ecosystem Science. Henry was a friend, colleague, and mentor of many ecosystem ecologists. His ecological research as a graduate student at Oregon State and as a professor at the University of Florida was cutting edge. His roles in advocating for and advancing ecosystem science and long-term research as a National Science Foundation program officer will have long-lasting, beneficial effects for science and society. Members of our organization were shocked and saddened by his untimely death. We, as members of the larger science community offer our sincere condolences to his family, his many friends, and all whose lives he touched during his time on Earth.
